

# JUAN SEBASTIAN PINTO

ETOBICOKE, ONTARIO - (437) 435 6922 - SEBASPINTO4@GMAIL.COM - [LINKEDIN](#)

## PROFESSIONAL SUMMARY

---

Passionate Software Developer with hands-on experience in backend systems, data processing, and low-code development. Demonstrated ability to deliver reliable, maintainable code and automate workflows using modern tools. Adept at cross-functional collaboration and committed to continuous learning and inclusive tech. Currently pursuing advanced training in low-code programming at George Brown College.

## TECHNICAL SKILLS

---

**Languages:** Python, Java, JavaScript, HTML, CSS.

**Frameworks/Tools:** Git, Azure, Power BI, UiPath, Power Apps, MS Office, Jira.

**Databases:** MySQL, PostgreSQL, SQLite, MongoDB.

**Other:** Object-Oriented Programming, Data Structures, Data Visualization, Low-Code Development, Agile.

## SUMMARY OF QUALIFICATIONS

---

- 3+ years of experience in software development and technical support roles across shipping, logistics, and IT sectors.
- Provided peer tutoring in Object-Oriented Programming, Data Structures, and Algorithms at Universidad NUR between 2022 and 2023
- Developed backend solutions in Python, Java, and .NET for enterprise systems, ensuring scalable and accurate data processing.
- Designed SQL-driven features for business intelligence, integrating reporting dashboards and supporting stakeholder analysis.
- Automated workflows that reduced manual processes and improved team efficiency by 30%.

## EDUCATION

---

### Computer Programming Low-Code Development

September 2024 – Present

George Brown College – GPA 3.6/4

### Advanced Diploma in Computer Programming and Analysis

February 2022 – December 2023

Universidad NUR – GPA 3.7/4

## EXPERIENCE

---

### Software Developer

January 2024 – July 2024

Artexacta S.R.L. & Mediterranean Shipping Company (MSC)

- Developed backend systems using Python, Java, and .NET, with a strong emphasis on data accuracy, scalability, and system integration.
- Worked on data-driven application features using SQL, designing and querying relational databases to support business insights.
- Created technical documentation and automated workflows to support decision-making and improve operational reliability.
- Gained exposure to structured datasets, data cleansing, and implementing logic to drive business-focused solutions.

### Personal Assistant

December 2022 – June 2023

UrbanLink S.R.L.

- Managed scheduling and supported internal data analysis and reporting tasks, collaborating closely with leadership and technical teams.

- Helped prepare client-focused reports and presentations, incorporating structured data insights into strategic communication.
- Contributed to automating repetitive administrative workflows using digital tools and basic scripting.

**Software Sales Representative**

**December 2021 – June 2022**

MTM Systems

- Demonstrated data-based software products to clients, highlighting the value of analytics in driving business decisions.
- Utilized CRM tools to manage client data, track sales activities, and generate performance reports.

## **COMMUNITY & ACTIVITIES**

---

- Active member of HispanoTech Toronto
- Member of GBC Computer Science Society & BYTE Club
- Participated in hackathons and technical workshops focused on education and automation
